- ✓ Resilient, high-performance storage
- ✓ Multi-site replication
- ✓ Active-active metro cluster
- ✓ Range of models and sizes
- ✓ 100% availability guarantee

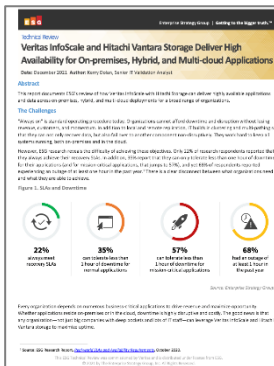

Virtual, physical, Kubernetes, multi-cloud infrastructure

WHY THIS MATTERS

Downtime is disruptive, and organizations spend significant time and money trying to remain “always on.” However, achieving that is more complex and difficult than expected.

Together, Veritas InfoScale and Hitachi Vantara Storage can help you keep your complete application stacks available for increased productivity. The joint solution is simple to manage across on-premises, hybrid, and multi-cloud infrastructure.
